

ENVIRONMENTAL POLICY

Avopiling is committed to the importance of respecting and causing minimum impact to the environment in which we operate.

To enforce its commitment to environmental protection, Avopiling shall take all reasonable steps to prevent any environmental incident with the following objectives;

Our objectives are:

- Comply with contractual, statutory, regulatory relating to environmental issues
- Managing environmental and related issues in accordance with any client requirements, policies or procedures.
- Minimise the chance of environmental incidents, the release of pollution and reducing noise impact through scheduled maintenance of plant and equipment
- Minimise waste through efficient material and plant utilization, plus re-use or recycling of material when appropriate.
- Dispose of waste properly using appropriate equipment, and by means which does not affect the health of workers disposing the waste;
- Have procedures and equipment in place allowing prompt response in the event of any emergency which could cause adverse environmental impacts
- Educating and training Avopiling workers to continually improve awareness, skills and knowledge of environmental issues and practices which could impact Avopiling or its undertakings.
- Continual improvement by conducting workplace audits and inspections & consultation with employees,

Reporting, investigating and resolving non conformances by implementing corrective actions to prevent recurrence.
