

# PILE DRIVING RIG

## JUNTAN PM 26

### RIG INFORMATION

The Junttan PM 26 is a multipurpose piling rig for heavy-duty working. The rig is considered one of the lightest and most efficient in its category. It has its advantage in maneuverability in tight places.

The rig can be equipped with pile driving, CFA, cast-insitu or large diameter piling equipment. The recommended hammer weight is from 6 000 to 14 000 kg and the maximum single piece pile length is 23 meters.

The rig has proven productivity due to easy and fast handling of piles and top pile driving performance with Junttan hydraulic hammers and rotary heads. An optional side drill or vibrator hammer makes pile driving even more efficient in some soil conditions. With optional Junttan equipment, optimised working set-up of the rig can be easily achieved.

Driving Mode	
Item	Details
Operation Weight	92.9 T
Max Operating Height	30.7 M
Pile Diameters	1200mm (steel tube)
Max Pile Length	23m (one piece)
Hammer Weight	14.5t (RAM 9t)
Transport Mode	
Length	30.235 m
Width	3.500 m
Height	3.350 m
